-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

1. Claims 6 and 17 are objected to because of the following informalities: the missing "and" before the recited last structure. Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 7-16, 18 and 20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 7-16 are indefinite because of depending upon cancelled claims.

Claim 18 is indefinite for reciting "a distance" without any correlation to the identical recitation recited in claim 17.

In claim 20, the same is applied to claim 18.

Claim Rejections - 35 USC § 102 and § 103

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 6, 17 and 19-21 are rejected under 35 U.S.C. 102(a) as being anticipated by EP 1,126,504 A, a reference cited by Applicant. EP '504's invention is directed to a method and apparatus for inductively coupled plasma treatment of substrate. EP '504 discloses that the apparatus can be used for sterilization (paragraph 1) and comprises the recited evacuable chamber, gas conduit and high frequency transmitting device, or two plasma generating coils wherein the plasma is inductively generated from an AC power supply (Fig. 1 and paragraphs 51, 53, 55 and 56).

As to the subject matter of claim 20, EP '504 discloses it in paragraph 52.

7. Claim 18 is rejected under 35 U.S.C. 103(a) as being unpatentable over EP '504. EP '504 as applied above further discloses in paragraph 61 that the size of the loops is at least the diameter *a* of the substrate. The subject matter as a whole would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified EP '504's teachings because it has been settled that proper adjustment of a known effective variable of a known or obvious process is within the capabilities of one having ordinary skill in the art. *In re Aller* 105 USPQ 233; *In re Boesch* 205 USPQ 215.
